Dilgeş SARIBULAK

Student-Frontend Developer

ABOUT ME

I have over 2.5 years of experience working with React and Next.js, and more than 3 years of experience with JavaScript and Python. Additionally, I have over 2 years of experience with C and C++.

I have a strong background in building reusable component libraries and developing design systems that ensure consistency and scalability across projects. I'm also well-versed in Object-Oriented Programming (OOP) and have completed several projects that challenged my problem-solving abilities and deepened my understanding of OOP principles.

My journey into frontend development began when I discovered React, which sparked a shift in my focus and passion. I started by building small projects to grasp the fundamentals and gradually advanced to more complex applications.

Through a variety of collaborative projects, I've developed strong teamwork and leadership skills, successfully working with both familiar and unfamiliar teammates to deliver high-quality outcomes.

While I initially explored multiple areas of software development, I've found that full-stack web development is where I thrive the most. It allows me to combine creativity with technical skill, and I am motivated by the opportunity to build impactful, user-focused applications from the ground up.

EDUCATION

Gazi Anatolian High School, İstanbul - Graduated

September 2016 - 2020

Gebze Technical University, Kocaeli- 3nd Grade - Student

September 2021 - 2026

Electronics Engineering, Communities: IEEE GTU, GTU BT (Computer Society).

Başakşehir/İstanbul
11 June 2002
